Philosophy

Nursing is recognized as an art and a science based on concepts, knowledge and clinical nursing care skills that are directed toward the promotion of health and the prevention of illness through communication and patient education.

Practical nursing education provides a formal program of scientific and theoretical information with concurrent clinical practice that is presented in a curriculum designed to progress from the simple to the complex. Additionally, the program follows the normal sequence of human growth, in health and, from birth until death. The aging of our population requires that the curriculum place an emphasis on the older client's physical, psychological and social well being, while assisting him or her to a dignified death or to live in a community with appropriate support systems.

The educational process is active, dynamic and takes a holistic approach, encompassing cultural, nutritional, pharmacological and biopsychosocial human needs. Nursing education will describe, explain, explore and predict individual human needs, needs of the patient's family, and those of society. Nursing utilizes the nursing process, applied through critical thinking, to facilitate the wellness of clients.

This practical nursing program is designed to respond to the emerging health care needs of the individual in a changing health care system in the United States, a system in which practical nursing will play an ever-growing integral role, helping to provide access to health care for people in their homes, hospitals, clinics, doctor's offices, extended health care facilities and nursing homes. Practical Nurses function within the standards of practice, demonstrating safe, competent, and legal/ethical practice.

Consistent with the philosophy of the institution, the practical nursing administration and faculty will work to create a climate in which students are motivated to maximize the use of their talents and abilities. The environment most conducive to learning is one in which the teacher and student share mutual respect, and where theory and clinical experiences are correlated and taught in a logical sequence. Practical nursing is an integral component of the nursing profession and provides a solid foundation for continuing nursing education as a continuum through articulation into professional nursing education programs. Nursing education supports continuation of self-development and maintenance of competency by active involvement in continuing education.

Program Description

Shawsheen Valley School of Practical Nursing is designed to provide eligibility for the graduate to take the NCLEX-PN (National Council Licensure Examination for Practical Nurses) examination upon graduation. This program is offered over a 40-week period that follows the Shawsheen Valley Regional High School's calendar and is offered in an evening and weekend format. This course provides the theoretical framework, skills laboratory and clinical practices that enable the graduate nurse to work within the scope of the practical nurse in Massachusetts.

Mission Statement

The Shawsheen Valley School of Practical Nursing provides a formal program of scientific and theoretical information with concurrent clinical practice that progresses from simple to complex, focusing on multi-formity and holistic components across the lifespan. This will prepare the practical nursing student for a nursing profession while stressing the importance of continuing education throughout their career.

Vision

We envision that the Shawsheen Valley School of Practical Nursing will:

- Prepare students to respond to the emerging health care needs of the individual in a changing health care system
- Enable students to function within the Massachusetts standards of practice, demonstrating safe, competent, legal, and ethical practice
- Employ highly qualified faculty that will create a climate in which students are motivated to maximize the use of their talents and abilities
- Foster an environment where critical thinking skills are developed
- Support community partnerships for the purpose of community service and integrating work experience with school programs
- Maintain a state-of-the-art facility that meets industry standards
- Practice sound and responsible fiscal management to provide appropriate resources for instruction
- Expect students to reach high academic and clinical achievement
